PRESS RELEASE

MOSTAGANEM - JULY 15, 2018

For the first time in Algeria

70th CIEAEM Symposium

«Mathematics and Living Together, Social Process and Didactic Principle»

15-19 July 2018, Mostaganem University

Under the High Patronage of the President of the Algerian Republic

In the dynamic of the adoption of the International Day of Living Together in Peace by the 72nd UN General Assembly on 8 December 2017, the theme of this edition of the symposium «Mathematics and Living Together, Social Process and Didactic Principle» emerged as an obvious one. Indeed the teaching of mathematics is a common foundation for all societies across time and space and it is now essential to involve the scientific field in the development of a «society of living together in peace» by its contribution in the pedagogical aspects by integrating the humanistic and social dimension. This theme is a remarkable specificity of this 70th edition that coincides with the 40th anniversary of the University of Mostaganem.

CIEAEM (International Commission for the Study and Improvement of Mathematics Education), Mostaganem University, Djanatu al Arif Foundation and AISA International NGO, organizers of this 70th edition, which is taking place for the first time in Algeria, opened their symposium this Sunday, July 15 at 10:30 at Mostaganem University.

The opening session was attended by Mr Tahar Hadjar Minister of Higher Education and Scientific Research, Mr Abdenour Rabhi Wali of Mostaganem and Mr Mustapha Belhakem Rector of Mostaganem University as well as Mr Ahmed Benzlikha, representative of the Minister of Communication, whom we thank very warmly for their presence. Ms Nouria Benghabrit, Minister of National Education, showed real interest in the symposium, which was attended by 116 academy inspectors representing all the wilayas of the country. The Ambassador of Indonesia and the Ambassador of Palestine attended the opening.

The international academic community was strongly represented by a significant number of members from major universities around the world.

The opening speeches by Mr Hadjar, Mr Rabhi, Mr Belhakem and Sheikh Khaled Bentounes underlined the importance of this theme today by recalling the essential role of mathematics in the civilizations that preceded us but also their involvement in all sectors of human activity today. The challenge that has been launched is the creation of pedagogy of mathematics teaching that is capable to conciliate the abstraction and rigor of this science with the Living Together that our societies urgently need.
